

12.1" Durable, High-Brightness Monitors with 800 × 600 Resolution Panel for Industrial Workstation Terminals

Durable Build

The monitors are capable of withstanding temperatures ranging from 0 - 50°C for high durability in industrial environments. In addition, the cabinets do not contain any ventilation holes and the perimeter of the control buttons are sealed, preventing dust and foreign objects from getting inside.

High-Brightness Display

The maximum brightness of 450 cd/m² for the DuraVision FDSV1201 and 350 cd/m² for the DuraVision FDSV1201T offers high visibility even in bright ambient environments.

LED Backlight

The monitors are equipped with energy-saving LED backlights that last longer and consume less power compared with conventional CCFL backlights. They are also mercury-free for minimal impact on the environment.

Flexible Positioning

The monitors can be installed facing up or down in positions from 0 - 90° for flexible placement. In addition, images can be viewed rotated at 180° using a function accessed via the monitor's front buttons for increased viewing flexibility.

Digital and Analog Inputs

Both monitors are equipped with a digital DVI-D 24 pin and analog D-Sub mini 15 pin for connecting to a PC.

Touch Panel Model

The touch model (FDSV1201T) is equipped with an analog resistive touch panel that has a minimum touch life of 10 million touches. It accepts touch input from both bare and gloved hands as well as styluses. It is also more resistant against dust and water compared to other touch technologies for high durability. Either the USB upstream or RS-232C port equipped with the touch model can be used for touch communication.

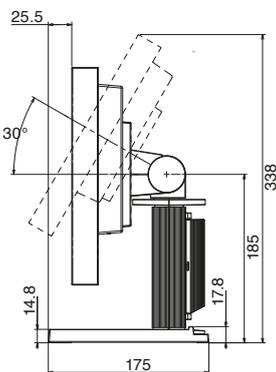

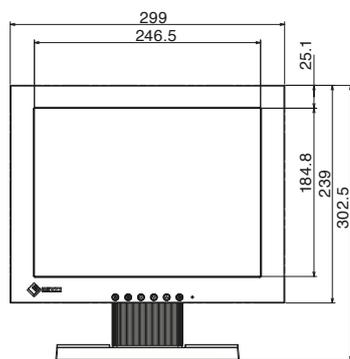

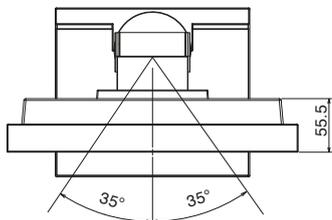

2-Year Manufacturer's Warranty

Both monitors are backed by a 2-year manufacturer's warranty for long-term reliability.

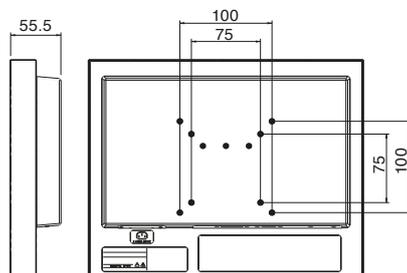

- Desktop (with tilt stand) and VESA mount versions available
- HDCP support
- Key lock support
- RoHS compliant
