Příklady z praxe

Shanghai Police: connecting the force to remote control centers

Traditional police-Time,
Cost and laborious

Take both hands! Low efficiency

Investigation, heavy workload

Passive interaction, slow response

Not for the complex environment

Low informatization/integration

Hands Free,
New item!

Příklady z praxe

realwear

RearWear changes your working methods

Hands free

Highly Informationized

Real-time audio and video recording

Big Data Support at Any Time

Great Improvement of Patrol Efficiency

> Solution

- RealWear HMT-1 is equipped with law enforcement personnel, which can share audio and video with the dispatching center, record the scene in real time, and get the command arrangement of the dispatching center in case of emergency.
- Dispatch Center experts can optimize the combination of police forces through remote dispatch, thus reducing the response time of arrest and cutting off the suspect's escape route as soon as possible.
- It saves a lot of time and improves the efficiency of investigation by intercepting multi-person images at one time for comparison.
- RealWear's solution can greatly shorten the time consumed by individual personnel, improve efficiency, reduce the hidden dangers of missing detection, and prevent social security problems.
