

Reference name:	ANDRITZ AG.,Knauf RU, Austria
Supplier:	ELVAC a.s.
Customer:	ABB Oy Process Automation, Finland
Market segment:	Paper industry - plasterboard production
Year of implementation:	2018
Price:	1.7 million CZK

Introductory text:

ELVAC a.s. participated in the production and delivery of switchboards for ABB Oy Process Automation, Finland. The delivery involved an eight-bay switchboard assembly. The FAT was conducted with the participation of the customer from ABB and no non-conformity was found during the process.

Application description:

The switchboards are used to power and control the technological process of plasterboard production and at the same time for communication with higher-level systems.

Applied products and technologies:

- Distribution boards from Rittal, type TS8
- Device filling from ABB
- Auxiliary industrial relays from Finder
- Terminal material from Phoenix Contact
